*An incredibly great book with perfect and lucid answers. Better then never, though i am quite late in start reading this one. You will not sense monotony at whenever you want of the time (that's what catalogues are for relating to if you question me).*

Mr. Gosse very graphically describes the death of a small fish struck by one of these thread-borne poisoned arrows, at some distance from the offended Actinia, who launched his dart, as it seemed, for no greater provocation than a slight disturbance of the water rather nearer to his retreat than was agreeable. The *Actinia gemmacea*, it would appear, is a more voracious creature than most of his congeners, for Dr. Johnston, in his splendid work on the British Zoophytes, describes one of this species that had managed to swallow a shell of *Pecten maximus* as large as...
