Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 Excerpt: .in parts of the vein where the dip is lowest. The ore is best where pyrite is most abundant. Locally the slaty country rock carries some gold, particularly where it is pyritized. About 75 per cent of the gold is free, and the concentrates consist almost wholly of pyrite. Taken as a whole, the quartz and mineralized country rock, which together form the ore, would be classed as a low-grade gold ore, but only ore from the richer shoots is mined. This gives a higher-grade ore but limits the available tonnage. The mine is developed by an adit 364 feet long, which follows down the dip of the vein. Four drifts—a short one at 70 feet, another at 100 feet, a third at 180 feet, and the fourth at 250 feet—constitute the chief development work. The ore is reduced by a 5-stamp Chalmers Williams mill, with plates and concentrating table, operated by three vertical turbines generating together 90 horsepower. The mill has a capacity of 12 tons a day. Water is brought from Harris Creek through a 250-foot flume and delivered with a head of 13 feet. - Chapin, Theodore, op. cit, p. 88. NOTES ON THE SALMON-UNUK RIVER REGION. Compiled by J. B. Mertie, Jr. INTRODUCTION. The Salmon-Unuk River region, in southeastern Alaska, is a trapezi- lorm area of about 1,800 square miles, lying between parallels 55 50 and 56 30 north latitude and meridians 129 50 and 131 10 west longitude. The international boundary...
